

Project Demo Planning

Date	15 July 2026
Team ID	SWTID-2026-3798
Project Name	Rising Waters-Flood Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the flood disaster problem, why early warning matters, and project objective	3 mins	Sathwik Obilipapannagari
2	Dataset & Data Preprocessing	Walk through dataset features, cleaning, and preprocessing steps taken	4 mins	Yagna Sri Vayala
3	Exploratory Data Analysis	Show key visualizations and insights from univariate/multivariate analysis	3 mins	Afshan Shaik
4	Model Building & Comparison	Explain the four models tested and how XGBoost was selected as the best performer	5 mins	Nehasini Thota
5	Live Web Application Demo	Show the Flask app in action-input rainfall/visibility data and get flood risk prediction	5 mins	Sathwik Obilipapannagari
6	Conclusion & Future Scope	Summarize results, mention IBM Cloud deployment plans, and answer questions	3 mins	All Team Members

Demo Flow Summary:

Step	Activity Notes
1	Introduction & Problem Statement
2	Solution Overview

3	Live Feature Demonstration
4	Q&A Session
